

Jack Abernathy  
MART 391  
Milestone 4

So far, I have been able to get the database tables and stored procedures completed and most of the web pages' outlines completed. I am now working on the queries I need to return the information the user requests. I.e: the queries that allow the user to view all the characters by class/race/professions etc. Once this is complete, I should be at a point of being able to begin work on finding a way to visually present the data in some kind of graphic. This, I think will be my more challenging portion of the assignment.

\*This is a rough overview of where I am at in regards to the project. I'm just about finished with the assignments and will upload them and email you with a list of the assignments I have updated.

Thank you so much for your patience with me and allowing me to work at getting everything finished.
